Nut Trees in the Winter Landscape

# NUT TREES

*"Buy Direct From The Grower"*

J. F. JONES NURSERIES

P. O. Box 356

Lancaster, Pa.

Stabler Black Walnut

Thomas Black Walnut

Wiltz Mayette

### BLACK WALNUTS

**THOMAS.** Largest nut of the varieties listed. The tree is the fastest grower of the lot. Nut husks better than average and makes a good appearance when sold in the shell.

**OHIO.** This variety makes a very symmetrical, well-branched tree. Nut medium size; kernel light colored and of excellent flavor. Husk of nut thick. Dependable bearing tree in southeast Pennsylvania.

**TEN EYCK.** Tree very symmetrical in growth. Nuts slightly smaller than Thomas; shells thin.

**STABLER.** Trees slow of growth, averaging 4 to 6 inches a year. Bears two types of nuts—one-lobe and two-lobe—on the same tree. Kernel sweet and mealy. Nut thin-shelled, easily cracked. One-lobe nuts fall out in one piece.

**ELMER MYERS.** This is one of the new varieties. Blossoms late, about with Wiltz Mayette English Walnut. Excellent, thin-shelled nut, easily cracked.

	Each	Per 10	50 to 100
1 to 2 ft. tall .....	\$1.50	\$12.50	\$ .95
2 to 3 ft. tall .....	1.75	15.00	1.15
3 to 4 ft. tall .....	2.00	17.50	1.40
4 to 5 ft. tall .....	2.25	20.00	1.65
5 to 6 ft. tall .....	2.50	23.50	1.90
6 to 8 ft. tall .....	2.75	25.00	2.15

### ENGLISH WALNUTS

**WILTZ MAYETTE.** Favorite variety because of its fine quality. A "Diamond" brand nut.

**ALPINE.** Large, rather rough-shelled nut. A local variety. Blossoms appear concurrently with most varieties of Black Walnut.

**OTHER VARIETIES** include Cut Leaf, Grenoble, Sinclair, Broadview, Hall, and Franquette English Walnuts. Quantity of trees available is limited. Grown exclusively for our patrons interested in a larger collection.

	Each	Per 10
1 to 2 ft. tall .....	\$1.50	\$12.50
2 to 3 ft. tall .....	1.75	15.00
3 to 4 ft. tall .....	2.00	17.50
4 to 5 ft. tall .....	2.25	20.00
5 to 6 ft. tall .....	2.50	22.50
6 to 8 ft. tall .....	2.75	25.00

Ohio Black Walnut

### FILBERTS

These plants attain about the height of a peach tree if kept trimmed to one stem. For best crop production they should be grown in tree form.

BARCELONA. Large nut of round type.

DUCHILLY. Nut large and long.

DAVIANA. Nut medium. A good variety to pollinate Barcelona flowers.

ITALIAN RED. Nut long; very attractive.

WHITE AVELINE. Nut medium to small. Most useful as a variety to pollinate other varieties.

PURPLE LEAF. Grown mainly for its ornamental value. Nuts medium to small.

JONES HYBRIDS. This is not a variety, but a collection of hybrid Filberts originating here through the efforts of the late J. F. Jones. These plants are grown under number. Selections are made which we feel are best suited to the locality where they are to be planted.

NOTE: Two or three varieties of Filberts should be planted for proper pollination. If you are not familiar with varieties we will be glad to make the proper selections.

	Each	Per 10
1 to 2 ft. tall .....	\$ .75	\$ 6.50
2 to 3 ft. tall .....	1.00	9.00
3 to 4 ft. tall .....	1.25	10.00
4 to 5 ft. tall .....	1.50	12.50
5 to 6 ft. tall .....	1.75	15.00

### BLIGHT-RESISTANT CHESTNUTS

The CHINESE CHESTNUT is the best substitute for the native American Chestnut which can be grown in the blight area. For this reason we are growing only this species. The trees bear early here. Quality of the nut is very good.

	Each	Per 10
1 to 2 ft. tall .....	\$ .75	\$ 6.50
2 to 3 ft. tall .....	1.00	9.00
3 to 4 ft. tall .....	1.25	10.00
4 to 5 ft. tall .....	1.50	12.50
5 to 6 ft. tall .....	1.75	15.00
6 to 8 ft. tall .....	2.00	17.50

Pleas Hican

Chinese Chestnut

### HICANS

Hicans are a natural hybrid between the hickories and northern varieties of pecans. The trees give the appearance of a smooth-barked hickory and are excellent for roadside or lawn. Adaptable to planting on a wide range of soils.

**MARQUARDT HICAN.** Tree grows rapidly. Variety from Burlington, Iowa. This is a hardy variety, but for crop production requires the same number of hot summer days as pecans do to mature a crop. (See page 9 in our current catalogue.)

**PLEAS HICAN.** This is a very thin-shelled nut. Tree graceful with dark green foliage. We also have **BIXBY** and **McALLISTER** hicans in limited quantity this season.

### HICKORIES

Hickory trees can be successfully planted on a wide range of soils. They require a fertile soil and should not be planted on soils of low fertility unless they can be built up with chemical and organic fertilizer materials.

**FAIRBANKS HICKORY.** A cross between the shagbark and bitternut. This is a fast-growing, early-bearing hybrid.

**STANLEY SHELLBARK.** A big-bottom shellbark or king nut.

### PECANS

**NORTHERN PECANS.** The varieties we are growing, Indiana, Busseron, Posey and Greenriver, can be grown under about the same conditions and climatic requirements. Pecan trees are hardy much farther north than nut crops may be expected to mature. The varieties listed as "northern" do extend the pecan planting belt farther north than southern varieties can be expected to mature crops.

Indiana Pecan

PRICES for Hicans, Hickories and Pecans:

	Each	Per 10
2 to 3 ft. tall . . . . .	\$2.00	\$17.50
3 to 4 ft. tall . . . . .	2.25	20.00
4 to 5 ft. tall . . . . .	2.50	22.50
5 to 6 ft. tall . . . . .	2.75	25.00
6 to 8 ft. tall . . . . .	3.00	27.50

(Stanley Shellbark trees add 25c per tree to above prices.)

The Heart Nut

**THE HEART NUT** (*Juglans cordiformis*)

This is our fastest-growing nut tree and is a sport of the Japan walnut. The nut is heart-shaped and the easiest nut to crack of the Japan walnut and butternut types. Flavor of the kernel similar to Japan walnuts or butternuts.

	Each	Per 10
2 to 3 ft. tall .....	\$2.00	\$17.50
3 to 4 ft. tall .....	2.25	20.00
4 to 5 ft. tall .....	2.50	22.50
5 to 6 ft. tall .....	2.75	25.00
6 to 8 ft. tall .....	3.00	27.50

**RIDENHOWER ALMOND TREES.** This is a hard-shelled almond, hardy in our climate.

	1-9	10-49
18 to 24" .....	\$.30	\$.22
2 to 3 ft. tall .....	.40	.30
3 to 4 ft. tall .....	.50	.40
4 to 5 ft. tall .....	.60	.50

**PERSIMMONS**

**EARLY GOLDEN.** This is a round-type fruit of excellent flavor. Ripens about the middle to the latter part of September here.

**LAMBERT.** Largest of the native varieties we are growing. Ripens its fruit over a long season.

**JOSEPHINE.** Fruit about size of Early Golden when pollinated and seeds mature. This variety is apparently fruiting without pollen because most of the crop is seedless. Crop midseason. Very prolific.

	Each	Per 10
1 to 2 ft. tall .....	\$1.50	\$12.50
2 to 3 ft. tall .....	1.75	15.00
3 to 4 ft. tall .....	2.00	17.50
4 to 5 ft. tall .....	2.25	20.00
5 to 6 ft. tall .....	2.50	22.50
6 to 8 ft. tall .....	2.75	25.00

**TERMS.** All shipments f. o. b. Lancaster. Cash before shipment.

**SPECIAL NOTICE:** Plant young, thrifty, well-grown nursery stock which can be handled easily and will transplant easily. We have new stock coming on in our nursery all the time, in excellent condition for transplanting. Heavy caliper, old trees, will give a better appearance right away, but the shock of transplanting is considerably greater. A younger tree will grow into maturity, and will fruit quicker than an old, stunted tree can get over the shock of transplanting.

If you have mislaid your copy of our twenty-page descriptive catalogue and cultural guide, we shall be pleased to send you another, on request.

### CHERRIES

**LARGE MONTMORENCY SOUR CHERRY.** This is the large, deep cherry-red variety grown almost exclusively in orchards. Excellent for home or market plantings. Sour Cherry, one year from the bud, on Mazzard roots.

	1-9	10-49	50-300
2 to 3 ft. tall .....	\$ .60	\$ .50	\$ .30
3 to 4 ft. tall .....	.80	.70	.50
4 to 6 ft. tall .....	.90	.80	.60

**SWEET CHERRIES.** Must be sprayed and cared for if the trees are to be successful. Most state agricultural colleges have information available on the care of these trees for each state. The information can easily be secured direct from their horticultural department or through local county agents.

**BLACK TARTARIAN.** Medium-sized purplish black. Tree bears heavily. Excellent pollinizer.

**SCHMIDT'S BIGARREAU.** Fruit midseason, 1 inch in diameter, purplish black.

**WINDSOR.** Fruit late midseason, dark red.

**BING.** Fruit midseason or later, very dark red, almost black.

**LAMBERT.** Fruit midseason, very dark, changing to reddish black.

**NAPOLEON (Royal Ann).** Fruit midseason, 1 inch in diameter, in varying shades of bright red over a yellowish background.

**YELLOW SPANISH.** Fruit midseason, bright amber-yellow.

**GOVERNOR WOOD.** Fruit early to midseason, crimson on a yellowish-white background.

**SENECA.** Bears very early fully two weeks earlier than Black Tartarian. Fruit purplish black.

Sweet cherry, one year from the bud on Mazzard roots.

	1-9	10-49	50-300
5-6 ft. tall .....	\$1.00	\$ .90	\$ .70
4-5 ft. tall .....	.90	.80	.60
3-4 ft. tall .....	.80	.65	.55
2-3 ft. tall .....	.60	.45	.35

**GUARANTEE.** Our trees are guaranteed to be true to name, size ordered, well-rooted nursery-grown stock. Should varieties prove untrue to label we will, on proper proof, be responsible only for the original purchase price of the tree. Because we cannot control either growing or handling conditions after the trees leave our hands, we cannot be responsible for either the success or failure of a planting. We use every possible care in the growing and handling of the trees. Our files contain many complimentary letters on the type nursery stock we ship as well as our method of packing trees for shipment. Claims for shortage or damaged stock must be made to us within 10 days after receipt of shipment. We can then make proper adjustment.

THE NURSERY IS CLOSED SUNDAYS.      WEEK-DAY HOURS 7 A. M. TO 5 P. M.
